

# Firefly Portable LED Video Display

Introducing the Firefly Portable LED Video Display. Designed to go anywhere you need big video pictures, scoreboards or graphics, anytime day or night. It can be used both indoor or outdoor. It is impervious to weather and adverse conditions. Use it to increase crowd participation, to show instant replays, to increase sales at the concession stands, for announcing future events and to generate revenue from third party advertisers.

Simply hook the firefly on the back of a midsize truck or SUV and drive to your destination. Connect the power, raise the 120 or 145 inch diagonal screen and in minutes your ready for the show.

Attach the Firefly to your video or digital camera for live video or your laptop for scoreboards or graphics, or combine them both together on one screen. Its that simple.

The Firefly comes ready to use with the LED screen, laptop player and software necessary for instant operation. Its evens comes with a scoring package preloaded on the laptop.

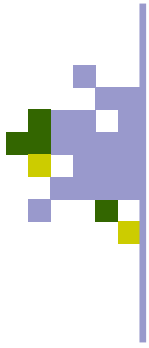

The best part is that its affordable. The entire 120 inch diagonal package is less than \$100,000. Or you can lease the 120 inch Firefly for less than \$1500 a month. In many cases advertising revenue alone will more than cover your lease costs. You can even rent the Firefly portable to other organizations needing a big screen.

## Firefly Key Features
